STRUCTURE

The main frame carrier parts are 2.2 cm beech plywood. Supporting pillars are 1.8 cm poplar plywood. The seating is reinforced with a 3 mm thick felt pad. Springs have a decisive influence on the comfort of sitting and that's why Caridia utilizes 3.8 mm thick steel Zig Zag springs in order to offer customers a comfortable feeling. The main parts of the frame such as front panel, outside back, and outside arms are coated with 28 DNS, 35 HR, and 25 Forta memory foam respectively and wrapped with 250 g/m² fiberfill. COMO offers 10 different setup variations with the help of different modules. Each module can be easily and securely fastened together with the help of the provided alligator clips.

SEATING COMFORT

The seating and back cushions are monoblock and designed as High Resilient (HR) foam. Caridia aims balancing the rigidity and the comfortability of COMO by employing a unique foam design in order to emphasize the quality sitting and perfect appearance. The sitting cushion is composed of three layers of foam at different density levels, 35 HR at the bottom, 25 HR in the middle, and 25 Forta memory foam on top of it, sitting cushion is framed with 45 HLB foam, and finally all coated with 250 g/m² fiberfill wrap. While the inner back and arms are coated with 25 HR and 25 Forta memory foam, upper arms and upper vertical parts are coated with 28 DNS, 25 HR, and 25 Forta memory foam in three layers and all wrapped with 250 g/m² fiberfill.

LEGS

COMO comes with custom designed 7,5 cm cylindrical metal feet offered in semi-matt black and chrome painted. It mounts easily to the frame and completes the desired seating ergonomics.
