

EFES ROLL

technical sheet

This product consists of 6 main modules.

- Module, 200 cm Sofa
- Module, 160 cm Single Arm Angled Sofa L/R
- Module, 100x163 Daybed
- Module, 240 cm Sofa
- Module, 200 cm Single Arm Angled Sofa L/R
- Module, Pouf 90x90

STRUCTURE

The main frame carrier parts are 2.2 cm beech plywood. Supporting pillars are 1.8 cm poplar plywood. The bottom is supported with 1.8 cm beech plywood. The seating is reinforced with a 3 mm thick felt pad. Springs have a decisive influence on the comfort of sitting and that's why Caridia utilizes 3.8 mm thick steel Zig Zag springs in order to offer customers a comfortable feeling. The main parts of the frame such as front panel, outside back, and outside arms are coated with 28 DNS foam and wrapped with 125 g/m² fiberfill.

SEATING COMFORT

The seating and backrest are monobloc and designed as High Resilient (HR) foam. The sitting cushion is composed of two layers of foam at different density levels, 35 HR at the bottom and 25 DNS Memory Foam on top of it, and finally coated with 125 g/m² fiberfill wrap. Above all, in order to provide the ultimate comfort and softness, the whole sofa sitting and back rest is covered with channeled down feather envelope filled with a special mix of goose feather and ball fiber. The EFES ROLL also comes with special design roll cushions in order to give your body the best support and angle. The inner back and upper vertical parts are coated with 26 Hyper foam, and wrapped with 125 g/ m² fiberfill. The sofa is designed with a 110-degree sitting and leaning angle to complement the product ergonomics, visuality and excellent appearance.

LEGS

Brushed black V-shape 13 cm metal legs are used under the EFES Roll sofa set. There are 6 legs in total and 2 of these are used for connection between 160 and 200 cm modules making 140-degree angle when mounted together. All metal legs are fixed to the frame with M8 bolts.
