

LIFE bergere

technical sheet

This product consists of 1 main module.

- Product: Bergere

STRUCTURE

The main frame carrier parts are 1.8 cm beech plywood. Supporting pillars are 1.4 cm poplar plywood. The seating is reinforced with a 3 mm thick felt pad. Springs have a decisive influence on seating comfort. Specific to the Life, Caridia utilizes elastic gimped webbing in order to offer a comfortable feeling without compromising quality.

SEATING COMFORT

The seating and backrest are monobloc and designed as High Resilient (HR) foam. Caridia aims balancing the rigidity and the comfortability of LIFE by employing a unique foam design in order to emphasize the quality sitting and perfect appearance. The back cushion is removable and filled with a special blend of goose down, ball fiber, and foam flakes. The sitting cushion is composed of four layers of foam at different density levels, 25 HR at the bottom and 35 HR + 25 HR in the middle, and 25 memory foam on top of it, and finally coated with 125 g/m² fiberfill wrap. The inner back is coated with 28 DNS foam and wrapped with 125 g/m² fiberfill wrap.

LEGS

While LIFE stands out with its custom design black swivel metal legs, it is also offered in chrome look.

STRUCTURE

FRAME	Plywood + Beech Plywood + MDF
SPRINGS	Elastic Gimped Webbing
LEGS	Custom Design Black Metal Swivel Legs
SEATING	25 HR + 35 HR + 25 HR + 25 DNS Memory Foam + Fiber 125 g/m ²
