## STRUCTURE

The main frame carrier parts are 2.2 cm beech plywood. Supporting pillars are 1.8 cm poplar plywood. The seating is reinforced with a 3 mm thick felt pad. Springs have a decisive influence on the comfort of sitting and that's why Caridia utilizes 3.8 mm thick steel Zig Zag springs in order to offer customers a comfortable feeling. The main parts of the frame such as front panel, outside back, and outside arms are coated with 28 DNS foam and wrapped with 250 g/m<sup>2</sup> fiberfill. SIENA offers 61 different setup variations with the help of different modules. Each module can be easily and securely fastened together with the help of the provided alligator clips.

## SEATING COMFORT

The seating and back cushions are removable and designed as High Resilient (HR) foam. Caridia aims balancing the rigidity and the comfortability of SIENA by employing a unique foam design in order to emphasize the quality sitting and perfect appearance. The sitting cushion is composed of three layers of foam at different density levels, 35 HR at the bottom, 25 HR in the middle, and down feather envelope filled with a special mix of goose feather and ball fiber on top, and finally coated with 250 g/m<sup>2</sup> fiberfill wrap.

## LEGS

SIENA stands out with its 20x40 mm ellipse profile metal frame offered in semi-matte black paint. The 5 cm custom design transport legs used in SIENA are easily mounted on the frame.
