

# TORINO

technical sheet

## This product consists of 10 main modules.

- Product: 213 cm Sofa
- Product: 253 cm Sofa
- Product: 195 cm Single Arm Sofa (L&R)
- Product: 235 cm Single Arm Sofa (L&R)
- Product: 115 x 170 cm Chaise Longue (L/R)
- Product: 233 cm Sofa
- Product: 273 cm Sofa
- Product: 215 cm Single Arm Sofa (L&R)
- Product: 255 cm Single Arm Sofa (L&R)
- Product: 110 x 110 Corner

## STRUCTURE

The main frame carrier parts are 2.2 cm beech plywood. Supporting pillars are 1.8 cm and 1.4 cm poplar plywood. The bottom is supported with 1.8 cm beech plywood. The seating is reinforced with a 3 mm thick felt pad. Springs have a decisive influence on the comfort of sitting and that's why Caridia utilizes 3.8 mm thick steel Zig Zag springs in order to offer customers a comfortable feeling. The main parts of the frame such as front panel, outside back, and outside arms are coated with 28 DNS foam and wrapped with 250 g/m<sup>2</sup> fiberfill. TORINO offers 8 different setup variations with the help of different modules. Each module can be easily and securely fastened together with the help of the provided alligator clips.

## SEATING COMFORT

The seating and back cushions are removable and designed as High Resilient (HR) foam. The back cushions are filled with a special blend of goose down and ball fiber. The sitting cushion is composed of three layers of foam at different density levels, 35 HR at the bottom, 25 HR in the middle, and down feather envelope filled with a special mix of goose feather and ball fiber on top, and finally coated with 250 g/m<sup>2</sup> fiberfill wrap. Inner back, inner arms, upper arms, and upper vertical parts are coated with 28 DNS foam and wrapped with 250 g/m<sup>2</sup> fiberfill. The sofa is designed with a 106-degree sitting and leaning angle to complement the product ergonomics, visibility and excellent appearance.

## LEGS

The 4 cm custom design transport legs used in TORINO are easily mounted on the frame. Sofas are also enhanced with middle support legs.
